VOLUME 48

1969

AMERICAN TELEPHONE AND TELEGRAPH COMPANY
NEW YORK

LIST OF ISSUES IN VOLUME 48

No. 1, January	Pages	1–320
No. 2, February		321–499
No. 3, March		501–818
No. 4, April		819–1099
No. 5, May–June		1101–1562
No. 6, July–August		1563–2058
No. 7, September		2059–2606
No. 8, October		2607–2908
No. 9, November		2909–3138
No. 10, December		3139–3448

Index iii
Contents xxix

NOTE: Words in parentheses precede words not in parentheses on the same line. For example,

Arrays (Directional)

should be read Directional Arrays. In subdivided subjects, words in parentheses precede the section heading and the words not in parentheses on the same line. For example,

Binary
Shift Registers (Tapped)

should be read Tapped Binary Shift Registers.

Index to Volume 48

A

Aaron, M. R. 1167–95
Acoustic Waves 1129–65
Active Networks 275–316
Adaptive Equalization of Highly Dispersive Channels for Data Transmission 55–70
Adaptive Equalizer (Continuously) 1865–84
Adders (Two's-Complement) 2999–3020
Adding Two Information Symbols to Certain Nonbinary BCH Codes and Some Applications 2405–24
Additive White Gaussian Noise Channel 71–86
Administration and Maintenance Plan (No. 2 ESS) 2765–816
Aiken, R. T. 1129–65
Albert, W. G. 993–1040
Algebraic Coding 691–728
Algorithm
(Chirp *z*-Transform) 1249–92
(Convergent) 3135–8
(Training) 55–70
Algorithms 201–7, 1101–13
(Work-Scheduling) 2963–74
Amplifier Design (Broadband 300 MHz IF) 1665–86
Amplifiers
(Common) 1853–64
(IF) 1687–702
(Power) 841–88
Amplitude and Phase Modulations in Resistive Diode Mixers 1967–98
Amplitude Distributions of Telephone Channel Noise and a Model for Impulse Noise 3243–63
Amplitude-to-Phase Conversion 541–614
Analog Data from a Bounded Source Space (Communication of) 3139–72
Analog-to-PCM Encoding 321–43
Analysis of Time Usage in Bell System Business Offices 2493–506
Anderson, C. D. 1853–64
Anderson, R. E. 953–81
Andrews, R. J. 2713–64
Angle-Modulated Systems 2333–58
Anisotropic Ferromagnetic Thin Films 3287–335
Antenna
Arrays (Directional) 3409–26
For Short-Hop Microwave Radio Systems (Packaged) 1605–22
Pointing (Radio-Relay) 3373–408
Antennas 1577–604, 1767–87
(Horn-Reflector) 1383–404
With Dielectric Plugs (Resonances in Waveguide) 2305–24
Aperture (Output-Coupling) 1919–36
Apollo Unified S-Band System 233–48
Apparatus and Equipment (No. 2 ESS) 2817–64
Apparent Increase in Noise Level When Television Pictures Are Frame-Repeated 527–40
The Application of Delta Modulation to Analog-to-PCM Encoding 321–43
Approximate Large-Signal Analysis of IMPATT Oscillators 383–96
Approximation
Of Linear Systems (Uniform) 209–31
(Validity of Statistical Linearization) 2529–43
Argon Ion Lasers 1405–19
Array
Camera Tubes and X-Ray Imaging (Diode) 345–82
Targets (Diode) 1481–528
Arrays
(Directional Antenna) 3409–26
(Phased) 2305–24
Assembler Program SWAP (Switching) 2865–96

Asymmetric Cylindrical Confocal Laser Resonator 1919–36
Attenuation 1421–44, 1563–604, 1727–43
By Rainfall at 18.5 GHz 1767–87
Of Microwaves by Intense Rain (Statistics on) 2949–62
(Sun Tracker Measurements of) 1383–404
Automatic Transversal Filters 1865–84

B

Backward Propagating Errors 1957–66
Banach Spaces 209–31
Bandpass Limiters (Limiter-Phase Detector-Filter Cascade) 233–48
Bandwidth
Expansion 1727–43
Reduction 2545–54
Barton, M. E. 2865–96
Basic and Regulating Repeaters (L-4 System) 841–88
Bates, C. P. 2259–80
BCH Codes (Adding Two Information Symbols to Certain Non-binary) 2405–24
Beams (Gaussian Light) 1445–57
Beam Waveguides 1909–18
Bell System Business Offices (Time Usage in) 2493–506
Bends 2161–88, 2259–80
Bends in Optical Dielectric Guides 2103–32
Beuscher, H. J. 2765–816
Bias of Signal Parameter Estimators (Bounds on the) 2023–30
Binary
Codes 3113–30
Shift Registers (Tapped) 321–43
Bishop, J. D. 1041–64
Bit Rates 659–74
Blecher, F. H. 821–39
Block
Coding 691–728
Length 691–728
Quantization 3059–74
Blue, J. L. 383–96
Bode Networks 889–952
Bode's Constant-Resistance Lattice Synthesis 637–58
Bodtmann, W. F. 1577–604, 1665–726
Bogner, R. E. 501–10
Boolean Expressions 1957–66
Bose-Chaudhuri-Hocquenghem Codes 729–42
Bosworth, R. H. 1459–79
Bounded Source Space (Communication of Analog Data from a) 3139–72
Bounds of a PM Wave (Spectral Density) 769–812
Bounds on the Bias of Signal Parameter Estimators 2023–30
Boyd, R. C. 821–39
Brady, P. T. 2445–72
Bridging Measurements 1313–38
Brightness
Errors 1537–53
Temperature 1383–404
Broadband
Negative-Resistance Oscillator Circuits 1937–55
Varactor Upconverters (Design of Efficient) 1623–49
Variolossers (Design of Efficient) 1687–702
Broadband 300 MHz IF Amplifier Design 1665–86
Brown, E. F. 1537–53
Browne, T. E. 443–76, 2619–68
Brune Method 637–58
Buchner, M. M., Jr., 1219–47, 3113–30
Buffers 615–36
Bunin, B. J. 3059–74
Burckhardt, C. B. 1529–35
Business Offices (Time Usage in Bell System) 2493–506
Busy-Hour Traffic 2607–18

C

Cable
And Apparatus (Coaxial) 1065–93
Systems (Coaxial) 821–39, 889–981, 983–1093

Systems (Overload Stability Problem in Submarine) 1853–64
Systems Preamplifiers (Coaxial) 841–88
Calculated Quantizing Noise of Single-Integration Delta-Modulation Coders 2359–89
CALIBRATION
Data (Rain Gauge) 1757–66
Transmission Measuring Sets 1313–38
CALL
Processing Plan (Service Features and) 2713–64
Programs 2607–18
Stores 2619–68
CAMERA
Tube 1529–35
Tube (Silicon Diode Array) 1481–528
Tubes and X-Ray Imaging (Diode Array) 345–82
CAMERAS (COLOR TELEVISION) 1885–907
Candy, J. C. 1459–79
CAPACITANCE GAUGES 1757–66
CARD WRITERS 2817–64
CARRIER PHASE (SINUSOIDAL) 769–812
CASCADE BANDPASS LIMITERS (LIMITER-PHASE DETECTOR-FILTER) 233–48
CENTIMETER AND MILLIMETER WAVES 2949–62
CENTRAL PROCESSING UNIT 2619–68
CENTREX SERVICE 443–96
Chai, S. Y. 1885–907
Chang, H. Y. 1957–66
CHANNEL
(Gaussian) 3075–89
Noise (Amplitude Distributions of Telephone) 3243–63
With Noisy Feedback (Discrete-Time Gaussian) 3173–86
CHANNELS
(Adaptive Equalization of Highly Dispersive) 55–70
(Determinability of Classes of Noisy) 3265–85
(Discrete Memoryless) 691–728
(General-Purpose Communication) 1865–84
Chaplin, N. J. 983–92
Chen, Mrs. H. 2493–506
Chester, A. N. 345–82
CHI-SQUARE DISTRIBUTION (COMPUTATION OF THE NONCENTRAL) 201–07
Chinnock, E. L. 511–26
The Chirp z-Transform Algorithm and Its Application 1249–92
CHRISTIANSEN FILTERS 1885–907
CIRCUIT
Analysis 1–54, 1293–311
Design by Singular Imbedding (Computer-Aided) 275–316
(Iris Wafer) 143–62
Mistuning (Tank) 541–614
Packs 2817–64
CIRCUITS
(Broadband Negative-Resistance Oscillator) 1937–55
(DC Switching) 1–34
(Dielectric Loss in Integrated Microwave) 2325–32
(Equivalent) 1967–98
(Logical) 1957–66
(Microwave) 1937–55
(Monolithic) 2059–69
(Parametric) 2189–219
(Service Test) 2669–712
(Sputtered Glass Waveguide for Integrated Optical) 3431–34
(Trunk) 2669–712
(Uniform Synthesis of Sequential) 1115–27
CIRCULAR ELECTRIC MODES 3217–32
Circular-Harmonic Computer Analysis of Rectangular Dielectric Waveguides 2133–60
CLASSES OF NOISY CHANNELS (DETERMINABILITY OF) 3265–85
CLICK SEQUENCES 2999–3020
CLOCKS 615–36
COAX 20 1065–93
Coaxial Cable and Apparatus (L-4 System) 1065–93

COAXIAL
Cable Systems 821–39, 889–981, 983–1093
Cable Systems Preamplifiers 841–88
System (L-4) 821–39, 841–981, 983–1093
COAXIALS (SERRATED-SEAM) 1065–93
CO-CHANNEL INTERFERENCE 743–67, 2333–58
CODE MODULATION (DIFFERENTIAL PULSE) 3059–74
CODER
For Television (Sliding-Scale Direct-Feedback PCM) 1537–53
For Television Transmission (Companded One-Bit) 1459–79
CODES
(Adding Two Information Symbols to Certain Nonbinary BCH) 2405–24
(Bose-Chaudhuri-Hocquenghem) 729–42
(Convolutional Reed-Solomon) 729–42
(Equivalence of Certain Harper) 3113–30
(Error-Correcting) 729–42, 1219–47
(Orthogonal) 71–86
(Significant-Bit Packed) 1219–47
CODING
(Block) 691–728
Delay (Finite and Infinite) 3139–72
(Digital) 2555–82
(Frame-Run) 2545–54
(Multilevel) 3021–30
Noise (Communications Systems Which Minimize) 3091–112
(Sequential) 691–728
COHERENT
Detection 413–42
Phase-Shift Keyed Systems 743–67
COLOR
Picture Telephone Systems 1885–907
Television Cameras 1885–907
COMMON AMPLIFIERS 1853–64
COMMON-CARRIER APPLICATIONS 1563–76
COMMUNICATION
Channels (General-Purpose) 1865–84
(Digital) 3173–86
Theory 413–42, 615–36, 691–767, 769–812, 1167–95, 1197–218, 1219–47, 1999–2030
On Communication of Analog Data from a Bounded Source Space 3139–72
Communication Systems Which Minimize Coding Noise 3091–112
COMMUNICATIONS
(Digital) 71–86
A Companded One-Bit Coder for Television Transmission 1459–79
COMPANDING 1459–79
COMPLEX TIME FUNCTION 501–10
COMPRESSION (TIME) 249–54
Computation of the Noncentral Chi-Square Distribution 201–7
COMPUTER
Analysis (Circular-Harmonic) 2133–60
Memories 659–74
Modeling 383–96
Programs 201–7, 1957–66
Simulation 87–142, 1167–95, 1909–18
Time 383–96
Computer-Aided Circuit Design by Singular Imbedding 275–316
COMPUTER-OPERATED
Devices 1313–38
Transmission Measuring Set (50 Hz-250 MHz) 1339–81
Computer Study of Quantizer Output Spectra 2391–403
COMPUTERS 1745–56
CONDITIONAL PICTURE-ELEMENT REPLENISHMENT 2545–54
On Conditions Under Which It Is Possible to Synchronize Digital Transmission Systems 1999–2022
CONDUCTION GAS LENS (QUADRATIC) 2281–303
CONFOCAL LASER RESONATOR (ASYMMETRIC CYLINDRICAL) 1919–36
CONFORMAL MAPPING 1421–44
CONSTANT (PROPAGATION) 1421–44, 2071–160
CONSTANT-RESISTANCE LATTICE SYNTHESIS (BODE'S) 637–58

CONTACTS (CUSTOMER) 2493–506
A Continuously Adaptive Equalizer for General-Purpose Communication Channels 1865–84
CONTOURING 1537–53
CONTOUR MASKING 2555–82
CONTROL
In Electromagnetic Wave Guidance (Directional) 2161–88
(Stored Program) 443–76
Unit System 2619–68
Units 2607–18
CONTROL SYSTEMS
(Jump Criteria of Nonlinear) 2529–43
(Linear Time-Varying Dynamic) 209–31
Control Unit System (No. 2 ESS) 2619–68
CONTROLLED INTERFERENCE WITH GEOSTATIONARY SATELLITES 3373–408
CONVECTION (THERMAL) 2281–303
CONVERGENT ALGORITHM 3135–8
CONVERSATION (TWO-WAY) 2445–72
CONVERSION
(Amplitude-To-Phase) 541–614
(Frequency) 1967–98
(Mode) 2103–32, 2161–88, 3187–215, 3217–32
CONVERTERS (POWER) 1041–64
CONVOLUTION TECHNIQUES 1249–92
Convolutional Reed-Solomon Codes 729–42
Cooper, R. B. 675–89
Correction Concerning Reflecting Objects in Coherent Illumination 817
CORRECTION OF MISALIGNED WAVEGUIDES (STEP) 1909–18
CORRELATION
Function of Two Random Variables (Extended) 3409–26
Statistics 1197–218
COUNTERS (UP-DOWN) 321–43
Coupled Wave Theory For Thick Hologram Gratings 2909–47
COUPLED WAVES (PERIODICALLY) 2189–219
COUPLER FOR INTEGRATED OPTICS (DIRECTIONAL) 2071–102
COUPLING
(Intermodal) 2259–80
(Mode) 2189–219
Crawford, A. B. 1605–22
CRITERIA
(Error) 209–31
Of Nonlinear Control Systems (Jump) 2529–43
CRITERION
(Mean-Square Error) 321–43
(Mean-Square Error Distortion) 3059–74
CROSS SCATTERING 1445–57
CROSSTALK 511–26, 3337–72

CURVED WAVEGUIDES (JUNCTION BETWEEN STRAIGHT AND) 2259–80
CUSTOMER
Contacts 2493–506
Loop Plant (Transmission Characteristics of) 3337–72
Cutoff Region of a Rectangular Waveguide with Losses, Its Properties and Uses 2221–58
CYCLIC ORDER (QUEUES SERVED IN) 675–89
CYCLING (ORDER) 2619–68
CYLINDRICAL
Confocal Laser Resonator (Asymmetric) 1919–36
Magnetic Domains 3287–335
Waveguides 2161–88

D

Daly, J. C. 1909–18
Danielmeyer, H. G. 1405–19
DATA
From a Bounded Source Space (Communication of Analog) 3139–72
(Input-Output) 1101–13
(Rain Gauge Calibration) 1757–66
Transmission 55–70, 2425–44
Data Transmission Error Probabilities in the Presence of Low-Frequency Removal and Noise 255–73

DC
Equations of Nonlinear Networks 1–34
Networks (Linear) 275–316
Switching Circuits 1–34
Transistor Networks (Nonlinear) 1293–311
DELAY
(Finite and Infinite Coding) 3139–72
(Insertion) 1339–81
Lines 1445–57
Lines (Ultrasonic) 659–74
DELAY-LINE FILTER (TAPPED) 55–70
DELAYS 615–36
(Time) 2975–97
(Transmission) 1999–2022
DELTA MODULATION 1459–79
(Application of) 321–43
(Calculated Quantizing Noise of Single-Integration) 2359–89
Granular Quantizing Noise 1197–218
(Response of) 1167–95
Delta Modulation Granular Quantizing Noise 1197–218
DEMODULATORS 233–48
A Dense Network for Rapid Measurement of Rainfall Rate 1745–56
DENSITY
Bounds of a PM Wave (Spectral) 769–812
Spectra (Power) 1197–218
Derosier, R. M. 3217–32
Design of Dither Waveforms for Quantized Visual Signals 2555–82
Design of Efficient Broadband Varactor Upconverters 1623–49
Design of Efficient Broadband Variolossers 1687–702
DETECTION
(Coherent) 413–42
(Differential) 413–42
(Multiplex *Touch-Tone*®) 249–54
DETECTOR-FILTER CASCADE BANDPASS LIMITERS (LIMITER-PHASE) 233–48
Determinability of Classes of Noisy Channels 3265–85
DEVIATORS (FREQUENCY) 143–62, 1937–55
DIAGNOSTIC PROGRAMS 2765–816
DIELECTRIC
Constant 1421–44
Guides (Bends in Optical) 2103–32
Loss in Integrated Microwave Circuits 2325–32
Mirrors (Scattering From) 511–26
Plugs (Resonances in Waveguide Antennas with) 2305–24
Rectangular Waveguide 2071–102
Slab Waveguide (Surface Imperfections of a) 3187–215
Substrates 1421–44
Waveguide (Diameter Changes of a Round) 3217–32
Waveguides 2221–58
Waveguides (Radiation Losses of) 3233–42
Waveguides (Rectangular) 2133–60
Dielectric Loss in Integrated Microwave Circuits 2325–32
Dielectric Rectangular Waveguide and Directional Coupler for Integrated Optics 2071–102
DIFFERENTIAL
Detection 413–42

1969 Contents

January

Some Theorems on Properties of DC Equations of Nonlinear Networks — I. W. Sandberg and A. N. Wilson, Jr. — 1

Some Theorems on the Dynamic Response of Nonlinear Transistor Networks — I. W. Sandberg — 35

Adaptive Equalization of Highly Dispersive Channels for Data Transmission — A. Gersho — 55

On the Probability of Error Using a Repeat-Request Strategy on the Additive White Gaussian Noise Channel — A. D. Wyner — 71

Second and Third Order Modulation Terms in the Distortion Produced when Noise Modulated FM Waves are Filtered — S. O. Rice — 87

Frequency Modulation of a Millimeter-Wave IMPATT Diode Oscillator and Related Harmonic Generation Effects — T. P. Lee and R. D. Standley — 143

Minimal Synthesis of Two-Variable Reactance Matrices — T. N. Rao — 163

Computation of the Noncentral Chi-Square Distribution — G. H. Robertson — 201

Uniform Approximation of Linear Systems — H. Heffes and P. E. Sarachik — 209

A Second Order Statistical Analysis of the Operation of a Limiter-Phase Detector-Filter Cascade — W. D. Wynn — 233

Multiplex *Touch-Tone*® Detection Using Time Speed-Up — J. F. O'Neill — 249

Data Transmission Error Probabilities in the Presence of Low-Frequency Removal and Noise — B. R. Saltzberg and M. K. Simon — 255

Computer-Aided Circuit Design by Singular Imbedding — E. B. Kozemchak and M. A. Murray-Lasso — 275

February

The Application of Delta Modulation to Analog-to-PCM Encoding — D. J. Goodman — 321

Diode Array Camera Tubes and X-Ray Imaging — A. N. Chester, T. C. Loomis, and M. M. Weiss — 345

Approximate Large-Signal Analysis of IMPATT Oscillators — J. L. Blue — 383

Digital PM Spectra by Transform Techniques — Leif Lundquist — 397

PSK Error Performance with Gaussian Noise and Interference — A. R. Rosenbaum — 413

New Time Division Switch Units for No. 101 ESS — T. E. Browne, D. J. Wadsworth, and R. K. York — 443

No. 101 ESS 4A Switch Unit — H. F. Priebe and E. L. Seley — 477

March

Frequency Sampling Filters—Hilbert Transformers and Resonators — R. E. Bogner — 501

Scattering from Dielectric Mirrors — D. Gloge, E. L. Chinnock, and H. E. Earl — 511

Apparent Increase in Noise Level When Television Pictures are Frame-Repeated — F. W. Mounts and D. E. Pearson — 527

The Generation and Accumulation of Timing Noise in PCM Systems—An Experimental and Theoretical Study — J. M. Manley — 541

Synchronizing Digital Networks — J. R. Pierce — 615

Extension of Bode's Constant Resistance Lattice Synthesis of Transfer Impedance Function — S. Y. Lee — 637

Recirculating Ultrasonic Stores: An Economical Approach To Sequential Storage with Bit Rates Beyond 100 MHz — E. K. Sittig and F. M. Smits — 659

Queues Served in Cyclic Order — R. B. Cooper and G. Murray — 675

A Hybrid Coding Scheme for Discrete Memoryless Channels — D. D. Falconer — 691

Convolutional Reed-Solomon Codes — P. M. Ebert and S. Y. Tong — 729

Error Rate Considerations for Coherent Phase-Shift Keyed Systems with Co-Channel Interference — V. K. Prabhu — 743

Spectral Density Bounds of a PM Wave — V. K. Prabhu and H. E. Rowe — 769

Brief: Correction Concerning Reflecting Objects in Coherent Illumination — L. H. Enloe — 817

April

Foreword — R. H. Klie — 819

The L-4 Coaxial System — F. H. Blecher, R. C. Boyd, F. J. Hallenbeck, and F. J. Herr — 821

Basic and Regulating Repeaters — J. L. Garrison, L. P. Labbe, and C. C. Rock — 841

Equalizing and Main Station Repeaters — F. C. Kelcourse, W. G. Sheerer, and R. J. Wirtz — 889

The Equalizer Remote-Control System — R. E. Anderson and C. R. Crue — 953

Solid State Devices — N. J. Chaplin, G. A. Dodson, and R. M. Jacobs — 983

Terminal Arrangements — W. G. Albert, J. B. Evans, Jr., T. J. Haley, T. B. Merrick, and T. H. Simmonds, Jr. — 993

Power Supplies — J. D. Bishop and S. Mottel — 1041

Coaxial Cable and Apparatus — G. H. Duvall and L. M. Rackson — 1065

May-June

On the Identification of Linear Time-Invariant Systems from Input-Output Data — B. Gopinath — 1101

Uniform Synthesis of Sequential Circuits — J. D. Ullman and P. Weiner — 1115

Propagation from a Point Source in a Randomly Refracting Medium — R. T. Aiken — 1129

Response of Delta Modulation to Gaussian Signals — M. R. Aaron, J. S. Fleischman, R. A. McDonald, and E. N. Protonotarios — 1167

Delta Modulation Granular Quantizing Noise — D. J. Goodman — 1197

A System Approach to Quantization and Transmission Error — M. M. Buchner, Jr. — 1219

The Chirp z-Transform Algorithm and Its Application — L. R. Rabiner, R. W. Schafer, and C. M. Rader — 1249

Some Network-Theoretic Properties of Nonlinear DC Transistor Networks — I. W. Sandberg and A. N. Willson, Jr. — 1293

Measuring Frequency Characteristics of Linear Two-Port Networks Automatically — J. G. Evans — 1313

A 50 Hz-250 MHz Computer-Operated Transmission Measuring Set — W. J. Geldart, G. D. Haynie, and R. G. Schleich — 1339

Sun Tracker Measurements of Attenuation by Rain at 16 and 30 GHz — R. W. Wilson — 1383

High-Power Single-Frequency Lasers Using Thin Metal Film Mode-Selection Filters — P. W. Smith, M. V. Schneider, and H. G. Danielmeyer — 1405

Microstrip Lines for Microwave Integrated Circuits — M. V. Schneider — 1421

Experimental Simulation of a Multiple Beam Optical Waveguide — D. Gloge and W. H. Steier — 1445

A Companded One-Bit Coder for Television Transmission — R. H. Bosworth and J. C. Candy — 1459

The Silicon Diode Array Camera Tube — M. H. Crowell and E. F. Labuda — 1481

Television Transmission of Holograms with Reduced Resolution Requirements on the Camera Tube — C. B. Burckhardt and L. H. Enloe — 1529

A Sliding-Scale Direct-Feedback PCM Coder for Television — E. F. Brown — 1537

July-August

Use of Frequencies Above 10 GHz for Common Carrier Applications — L. C. Tillotson — 1563

Short Hop Radio System Experiment — C. L. Ruthroff, T. L. Osborne, and W. F. Bodtmann — 1577

A Packaged Antenna for Short-Hop Microwave Radio Systems — A. B. Crawford and R. H. Turrin — 1605

Design of Efficient Broadband Varactor Upconverters — T. L. Osborne — 1623

Low Noise Receiving Downconverter — T. L. Onborne, L. U. Kibler, and W. W. Snell — 1651

Broadband 300 MHz IF Amplifier Design — W. F. Bodtmann and F. E. Guilfoyle — 1665

Design of Efficient Broadband Variolossers — W. F. Bodtmann — 1687

Microwave and Millimeter Wave Hybrid Integrated Circuits for Radio Systems — M. V. Schneider, B. Glance, and W. F. Bodtmann — 1703

Interference in a Dense Radio Network — C. L. Ruthroff and L. C. Tillotson — 1727

A Dense Network for Rapid Measurement of Rainfall Rate — R. A. Semplak and H. E. Keller — 1745

Statistical Treatment of Rain Gauge Calibration Data — Mrs. A. E. Freeny — 1757

Some Measurements of Attenuation by Rainfall at 18.5 GHz — R. A. Semplak and R. H. Turrin — 1767

A Statistical Description of Intense Rainfall — Mrs. A. E. Freeny and J. D. Gabbe — 1789

Overload Stability Problem in Submarine Cable Systems — C. D. Anderson — 1853

A Continuously Adaptive Equalizer for General-Purpose Communication Channels — H. Rudin — 1865

An Imaging System Exhibiting Wavelength-Dependent Resolution — S. Y. Chai — 1885

Step Correction of Misaligned Waveguides — J. C. Daly — 1909

Eigenmodes of an Asymmetric Cylindrical Confocal Laser Resonator with a Single Output-Coupling Aperture — D. E. McCumber — 1919

Some Basic Characteristics of Broadband Negative Resistance Oscillator Circuits — K. Kurokawa — 1937

A Method for Digitally Simulating Shorted Input Diode Failures — H. Y. Chang — 1957

Amplitude and Phase Modulations in Resistive Diode Mixers — C. Dragone — 1967

On Conditions Under Which It Is Possible to Synchronize Digital Transmission Systems — I. W. Sandberg — 1999

Bounds on the Bias of Signal Parameter Estimators — J. Ziv — 2023

Solutions of Fokker-Planck Equation with Applications in Nonlinear Random Vibration — S. C. Liu — 2031

September

Integrated Optics: An Introduction — S. E. Miller — 2059

Dielectric Rectangular Waveguide and Directional Coupler for Integrated Optics — E. A. J. Marcatili — 2071

Bends in Optical Dielectric Guides — E. A. J. Marcatili — 2103

A Circular-Harmonic Computer Analysis of Rectangular Dielectric Waveguides — J. E. Goell — 2133

Improved Relations Describing Directional Control in Electromagnetic Wave Guidance — E. A. J. Marcatili and S. E. Miller — 2161

Some Theory and Applications of Periodically Coupled Waves — S. E. Miller — 2189

The Cutoff Region of a Rectangular Waveguide with Losses, Its Properties and Uses — L. U. Kibler — 2221

Intermodal Coupling at the Junction Between Straight and Curved Waveguides — C. P. Bates — 2259

A Quadratic Conduction Gas Lens — C. A. Fritsch and D. J. Prager — 2281

Resonances in Waveguide Antennas with Dielectric Plugs — C. P. Wu — 2305

Dielectric Loss in Integrated Microwave Circuits — M. V. Schneider — 2325

Interchannel Interference Considerations in Angle-Modulated Systems — V. K. Prabhu and L. H. Enloe — 2333

Calculated Quantizing Noise of Single-Integration Delta-Modulation Coders — J. E. Iwersen — 2359

Computer Study of Quantizer Output Spectra — G. H. Robertson — 2391

Adding Two Information Symbols to Certain Nonbinary BCH Codes and Some Applications — J. K. Wolf — 2405

Synthesis of Pulse-Shaping Networks in the Time Domain — D. A. Spaulding — 2425

A Model for Generating On-Off Speech Patterns in Two-Way Conversation — P. T. Brady — 2445

Mobile Radio Diversity Reception — E. N. Gilbert — 2473

An Analysis of Time Usage in Bell System Business Offices — W. H. Williams and Mrs. H. Chen — 2493

A Heterodyne Scanning System for Hologram Transmission — A. B. Larsen — 2507

Jump Criteria of Nonlinear Control Systems and the Validity of Statistical Linearization Approximation — S. H. Kyong — 2529

A Video Encoding System Using Conditional Picture-Element Replenishment — F. W. Mounts — 2545

Design of Dither Waveforms for Quantized Visual Signals — J. O. Limb — 2555

Digital Differential Quantizer for Television — J. O. Limb and F. W. Mounts — 2583

October

System Organization and Objectives — A. E. Spencer and F. S. Vigilante — 2607

Control Unit System — T. E. Browne, T. M. Quinn, W. N. Toy, and J. E. Yates — 2619

Peripheral System — J. Digrindakis, L. Freimanis, H. R. Hofmann, and R. G. Taylor — 2669

Service Features and Call Processing Plan — R. J. Andrews, J. J. Driscoll, J. A. Herndon, P. C. Richards, and L. R. Roberts — 2731

Administration and Maintenance Plan — H. J. Beuscher, G. E. Fessler, D. W. Huffman, P. J. Kennedy, and E. Nussbaum — 2765

Apparatus and Equipment — C. W. Lonnquist, J. C. Manganello, R. S. Skinner, M. T. Skubiak, and D. J. Wadsworth — 2817

Service Programs — M. E. Barton, N. M. Haller, and G. W. Ricker — 2865

November

Coupled Wave Theory for Thick Hologram Gratings — H. Kogelnik — 2909

Statistics on Attenuation of Microwaves by Intense Rain — D. C. Hogg — 2949

Work-Scheduling Algorithms: A Nonprobabilistic Queuing Study (with Possible Application to No. 1 ESS) — J. B. Kruskal — 2963

Some Properties of a Nonlinear Model of a System for Synchronizing Digital Transmission Networks — I. W. Sandberg — 2975

Overflow Oscillations in Digital Filters — P. M. Ebert, J. E. Mazo, and M. G. Taylor — 2999

Rate Optimization for Digital Frequency Modulation — J. E. Mazo, H. E. Rowe, and J. Salz — 3021

Power Spectrum of Hard-Limited Gaussian Processes — H. M. Hall — 3031

Rate-Distortion Functions for Gaussian Markov Processes — B. J. Bunin — 3059

The Optimum Linear Modulator for a Gaussian Source Used with a Gaussian Channel — R. J. Pilc — 3075

Communication Systems Which Minimize Coding Noise — B. McMillan — 3091

The Equivalence of Certain Harper Codes — M. M. Buchner, Jr. — 3113

Brief: Solving Nonlinear Network Equations Using Optimization Techniques — A. Gersho — 3135

December

On Communication of Analog Data From a Bounded Source Space — A. D. Wyner and J. Ziv — 3139

On Digital Communication Over a Discrete-Time Gaussian Channel with Noisy Feedback — A. D. Wyner — 3173

Mode Conversion Caused by Surface Imperfections of a Dielectric Slab Waveguide — D. Marcuse — 3187

Mode Conversion Caused by Diameter Changes of a Round Dielectric Waveguide — D. Marcuse and R. M. Derosier — 3217

Radiation Losses of Dielectric Waveguides in Terms of the Power Spectrum of the Wall Distortion Function — D. Marcuse — 3233

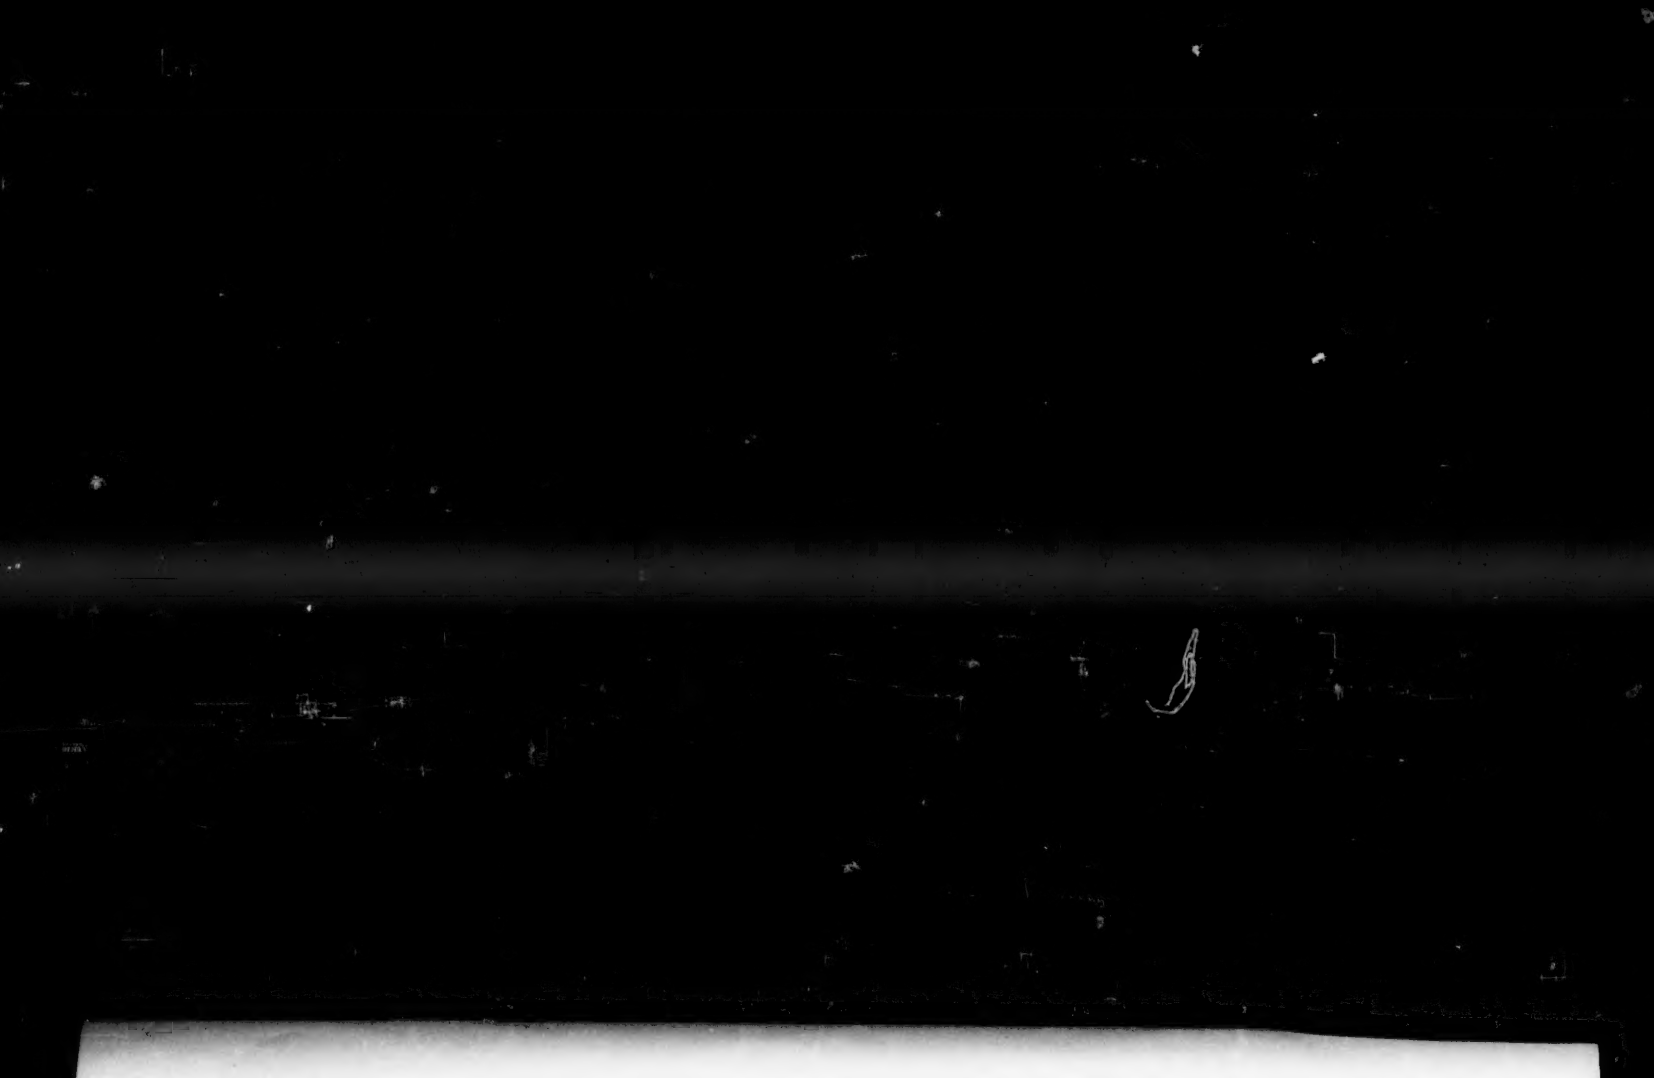
Amplitude Distributions of Telephone Channel Noise and a Model for Impulse Noise — J. H. Fennick — 3243

The Determinability of Classes of Noisy Channels — L. J. Forys — 3265

The Theory of Cylindrical Magnetic Domains — A. A. Thiele — 3287

Physical and Transmission Characteristics of Customer Loop Plant — P. A. Gresh — 3337

Radio-Relay Antenna Pointing for Controlled Interference with Geostationary Satellites — C. W. Lundgren and A. S. May — 3387

An Extended Correlation Function of Two Random Variables Applied to Mobile Radio Transmission — W. C.-Y. Lee — 3423


Brief: Sputtered Glass Waveguide for Integrated Optical Circuits — J. E. Goell and R. D. Standley — 3445
